/ TASK 3.6 Create web app where users can create a profile, which they can use to reserve cabins or camping spots.

TASK 3.6 Create web app where users can create a profile, which they can use to reserve cabins or camping spots.

Готово: Просмотреть Готово: Давать ответ на задание Готово: Получить оценку

- Create website for Ski National Park in Carpathian Mountains, Czech Republic. The park wants to enable website users to create a profile, which they can use to reserve cabins or camping spots.
- To create a profile, a user needs to provide a username and a password that conform to a set of rules, along with an email address.
- In addition, each user will have the option of specifying one or more cabins or camping areas as favorites, which will be associated with their profile
- Create desktop and mobile version of application

Note: This task about **Data in Strings and Arrays.**

Your task will be to use properties and methods of the String, Regexp, Array, and JSON objects to check and manipulate values entered by users
